# THE DARK SIDE OF CRYPTOCURRENCIES

- 7 NOVEMBER 2017 -

ROOM "SEMINARI MATEMATICA" (POVO O), VIA SOMMARIVE 14, POVO (TN)

*We present Monero, which is one of the cryptocurrencies that can achieve a very high level of anonymity. Its nearly-perfect anonymity is obtained by use of advanced cryptographic primitives.*

*In this short workshop we provide first an introduction to Monero that can be understood without a mathematical background, then we will detail the mathematical details for people interested in them, finally we will present fully the Monero protocol.*

## Programme

**10.00 - 10.30** Welcome to registered participants

**10.3 - 11.00** A gentle introduction to Monero

*Dr. PhD Michela Ceria*

**11.00 - 11.30** Ring signatures and other mathematical foundations for Monero

*Prof. Massimiliano Sala*

**11.30 - 12.00** Monero 2017 uncovered

*Dr. PhD Michela Ceria*

**Registration needed.**
