

The organizing committee has the pleasure of inviting you to participate in the sixth Spanish, Italian and Netherlands meeting on Game Theory (SING 6), to be held in Palermo, Italy, July 7-9, 2010. The meeting is under the auspices of IEEE.

Game Theory is a mathematical framework dealing with models of conflict and cooperation among interdependent decision makers. It is a central tool for economics and the social sciences, poses challenging research questions in mathematics, control, and optimization, and is applied across a wide variety of fields, including neuroscience, philosophy, and biology.

SING 6 is the sixth in the series of Spain-Italy-Netherlands Meetings on Game Theory. Presentations will focus on new research directions in different disciplines. The meeting provides an avenue where new research collaborations can be forged.
