

Index of Symbols

- $(\text{ad}L)^*$, 4
 $A_1 \cong A_2$ (isomorphic algebras), 21
 A_{Lie} , 3
 $C(L)$ (centre), 17
 $C \sim C'$ (equivalence of Cartan matrices), 161
 $C_L(S)$ (centralizer), 17
 $C_i(L)$ (term of the upper central series), 21
 C_ρ (coefficient space), 243
 H^* (dual space of H), 112
 L^i (term of the lower central series), 20
 $L^{(i)}$ (term of the derived series), 20
 $L_0(K)$ (Fitting-zero component), 63
 $L_1(K)$ (Fitting-one component), 63
 $L_1 \times L_2$, 25
 L_f , 5
 $M_d(X)$, 259
 $M_n(F)$, 3
 $N_L(V)$ (normalizer), 18
 $N_\rho(K)$ (largest nilpotency ideal), 244
 $P(V)$, 313
 P_+ (dominant weights), 314
 S_ρ , 243
 $V(\lambda)$, 317
 $V_0(K)$ (Fitting-zero component), 63
 $V_0(p(a))$, 369
 $V_1(K)$ (Fitting-one component), 63
 V_λ (weight space), 313
 X^* (free monoid), 220
 $[V, W]$ (product space of V and W), 19
 $[,]$, 2
 $\text{Aut}(L)$, 26
 $\text{Der}(A)$, 23
 $\text{End}(V)$, 2
 $\text{Hom}_F(V, W)$, 28
 $\text{Hom}_L(V, W)$ (endomorphisms commuting with the action of L), 95
 $\text{LM}(f)$ (leading monomial), 220, 229, 262, 286
 $\text{Nf}(f)$ (normal form), 221, 231, 263
 $\text{NR}(L)$ (nilradical), 42
 Φ^+ (positive roots), 158
 Φ^- (negative roots), 158
 $\Phi_1 \cong \Phi_2$ (isomorphic root systems), 152
 $\Phi_1 \oplus \Phi_2$ (direct sum of root systems), 153
 $\text{SR}(L)$ (solvable radical), 45
 $\text{Tr}(a)$ (trace of a linear transformation), 4
 adx , 4
 $<_{\text{dlex}}$, 220, 229
 $\ell(g)$ (length of g), 326
 $F\langle X \rangle$ (free associative algebra), 220
 $\text{ht}(\beta)$ (height of β), 161
 $\text{im}(\theta)$ (image of a morphism), 21
 κ_L, κ (Killing form), 91
 $\ker(\theta)$ (kernel of a morphism), 21
 $\langle X \mid R \rangle$ (finitely presented Lie algebra), 261
 $\langle \beta, \alpha \rangle$, 152
 $\mathfrak{b}_n(F)$, 7
 $\mathfrak{gl}(V)$, 3
 $\mathfrak{gl}_n(F)$, 3
 $\mathfrak{n}_n(F)$, 7
 $\mathfrak{o}_{2l+1}(F)$, 7

$\mathfrak{o}_{2l}(F)$, 7 $\mathfrak{sl}_n(F)$, 4 $\mathfrak{sp}_{2l}(F)$, 6 $\text{Rad}(A)$, 364 $\rho(L)^*$ (enveloping algebra), 219 c_{ij}^k , 7 m_μ (multiplicity of μ), 333 $n(g)$, 327 (L_1) , 2 (L_2) , 2

Index of Terminology

- S*-element, 232
- α -string containing β , 147, 155
- p*-map, 31
- p*-th power mapping, 31

- Abelian Lie algebra, 18
- action of a Lie algebra on a vector space, 27
- adjoint map, 4
- adjoint representation, 28
- admissible configuration, 169
- Ado's theorem, 251
- algebra, 1
 - associative, 2
 - Lie, 2
- alternating element, 342
- appliance, 262, 289
- associative law, 2
- automorphism of a Lie algebra, 26

- bilinear form, 5
- branching rule, 359

- canonical basis, 183
- canonical generators, 182
- Cartan matrix, 161
- Cartan's criterion for semisimplicity, 91
- Cartan's criterion for solvability, 51
- Casimir operator, 96
 - universal, 334
- central component, 34
- centralizer, 17
- centre, 18
- coefficient of a representation, 243
- commutative Lie algebra, 18
- commutator, 2

- completely reducible module, 29
- composition, 225, 293
 - useful, 295
 - useless, 295
- composition series, 29
- Coxeter diagram, 169

- decomposing element, 125, 375
- deglex order, 220, 229
- degree compatible order, 229
- degree of free magma elements, 259
- derivation, 22
 - inner, 24
 - outer, 24
- derived series, 20
- derived subalgebra, 20
- descending chain condition, 220, 229, 262, 286
- diagram automorphism, 194
- direct sum
 - of *L*-modules, 28
 - of Lie algebras, 25
 - root systems, 153
- dominant integral linear function, 314
- Dorroh extension, 363
- Dynkin diagram, 167

- Engel's theorem, 41
- equivalence
 - of *L*-modules, 28
 - of Cartan matrices, 161
- even orthogonal Lie algebra, 7

- faithful representation, 27
- finite presentation, 261
- finitely presented Lie algebra, 261
- Fitting decomposition, 63

- Fitting-null component, 63
- Fitting-one component, 63
- foliage, 275
- formal character, 342
- free algebra, 259
- free associative algebra, 220
- free Lie algebra, 259
- free magma, 259
- free monoid, 220
- Freudenthal's multiplicity formula, 333
- fundamental dominant weights, 317
- Gröbner basis
 - in a free algebra, 263
 - in a free associative algebra, 223
 - in a free Lie algebra, 292
 - in a universal enveloping algebra, 231
 - left, 239
- Hall order, 271
- Hall set, 271
- Hall word, 276
- height of a root, 161
- highest weight, 145, 314
- highest-weight module, 314
- highest-weight vector, 145, 314
- hypercentre, 21
- ideal, 1
- idempotent, 367
 - central, 373
 - orthogonal, 368
 - primitive, 368
- inner automorphism, 27
- inner automorphism group, 27
- integral linear function, 313
- irreducible
 - character, 352
 - module, 29
 - rootsystem, 153
- isomorphism
 - of algebras, 2
 - of root systems, 152
- Iwasawa's theorem, 254
- Jacobi identity, 2
- Jordan decomposition, 372
- Killing form, 91
- Klymik's formula, 355
- Kostant's formula, 350
- largest nilpotency ideal, 244
- Las Vegas algorithm, 15
- leading monomial, 220, 229
- left-normal form, 238
- Leibniz formula, 23
- length of a Weyl group element, 326
- letters, 273
- level of a weight, 331
- Levi subalgebra, 106
- Levi's theorem, 104
- lexicographical order, 281
- Lie bracket, 2
- Lie polynomial, 276
- Lie's theorem, 48
- linear
 - associative algebra, 363
 - Lie algebra, 4
- longest element in a Weyl group, 327
- lower central series, 20
- Lyndon-Shirshov words, 282
- module, 27
- morphism
 - of L -modules, 28
 - of algebras, 2

- multiplication, 1
- multiplication table, 9
- multiplicative order, 220, 229, 262, 286
- multiplicity of a weight, 333
- negative root, 158
- nilpotency class, 20
- nilpotency ideal, 243
- nilpotent
 - associative algebra, 364
 - element, 54
 - Lie algebra, 20
- nilradical, 42
- non-degenerate bilinear form, 5
- normal monomials, 263, 292
- normal words, 221, 231
- normalizer, 18
- odd orthogonal Lie algebra, 7
- Poincaré-Birkhoff-Witt theorem, 227
- polynomial map, 72
- positive root, 158
- primary components, 58
- primary decomposition, 58
- product space, 19
- projection matrix, 360
- quasi-Hall set, 271
- quotient algebra, 3
- quotient module, 29
- Racah's formula, 351, 355
- radical of an associative algebra, 364
- rank of a Lie algebra, 67
- rank of a root system, 151
- reduced expression (for a Weyl group element), 318
- reduction, 222, 231
- reduction order, 286
- reflecting hyperplane, 150
- reflection, 150
- regular element, 67
- representation of a Lie algebra, 27
- restricted Lie algebra, 29
- reverse lexicographical order, 283
- root, 69
 - long, 201
 - short, 201
- root lattice, 190
- root order, 158
 - lexicographical, 158
- root space, 69
- root space decomposition, 70
- root system, 151
- self-reduced set, 223, 263, 294
- semidirect sum, 25
- semisimple
 - associative algebra, 365
 - Lie algebra, 91
 - linear transformation, 370
- Serre's theorem, 307
- Shirshov's theorem, 294
- sign of an element of the Weyl group, 342
- simple
 - Lie algebra, 92
 - reflection, 166
 - root, 158
 - system of roots, 160
 - type, 177
- simply-laced root system, 189
- solvable Lie algebra, 20
- solvable radical, 45
- special linear Lie algebra, 5
- split
 - Cartan subalgebra, 69
 - linear Lie algebra, 47
- splitting element, 121, 374

standard factorization, 290
standard monomial, 228
standard sequence, 273
Steinberg's formula, 355
structural invariant, 143
 complete, 143
structure constants, 8
subalgebra, 1
submodule, 28
symmetric element, 342
symplectic Lie algebra, 6

toral subalgebra, 136
Trace form, 90
type of a semisimple Lie algebra,
 207

upper central series, 21

Verma module, 315

weight, 145, 303, 313
weight lattice, 317
weight space, 145, 303, 313
weight vector, 145, 303, 313
weight-coordinate vectors, 324
Weyl group, 164
Weyl vector, 165
Weyl's character formula, 347
Weyl's dimension formula, 347
Weyl's theorem, 99
